EDUCATION

B.Sc. Computer Science (AI Concentration) | DePaul University

Class of 2026

- Founder and President of DePaul's RoboTech Society
- Member of The National Society of Leadership and Success (NSLS)

EXPERIENCE & PROJECTS

Mobile Developer | Contract | Ganance Inc.

Jun. 2025 - Present

- Developed and shipped mobile features using Swift and scalable backend architecture, supporting real-time wearable data synchronization
- Designed and implemented data pipelines and backend logic to process wearable data (steps, calories, activity), enabling analytics and performance optimization
- Collaborated cross-functionally to translate product requirements into data-driven features and analytics workflows

Research Assistant (Brain-Computer Interface) | DePaul University

Mar. 2025 - Oct. 2025

- Explored the feasibility of EEG-based BCI using Python and C to enable real-time control of a robotic arm for painting, demonstrating how neural activity can be translated into artistic expression
- Processed and analyzed high-noise neural datasets to extract meaningful signal patterns for real-time system control
- Performed data validation and noise reduction techniques to enhance reliability of complex biological data
- Built ML models to convert raw EEG signals into actionable outputs, improving system accuracy and responsiveness

Research Assistant (Humanoid Systems) | DePaul University

Mar. 2024 - Aug. 2025

- Designed and developed a humanoid robotic system integrating sensor data (air quality, pressure, gyroscope) for real-time environmental awareness using Python and Raspberry pi
- Built data processing pipelines to interpret sensor inputs and enable autonomous decision-making
- Applied AI techniques to improve system responsiveness and interaction with dynamic environments

Stock Exchange Simulation | SE350 | DePaul University

Jan. 2025 - Mar. 2025

- Modeled trading systems using Java and processed real-time financial data
- Built structured systems for analyzing pricing and transaction flows

Pharmacy Technician | Walgreens

Feb. 2023 - Mar. 2025

- Maintained high data accuracy across prescription workflows and inventory systems
- Identified inefficiencies in operational processes, improving turnaround times

Project Manager | Capstone | DePaul University

Sep. 2024 - Nov. 2024

- Led development of a full-stack analytics platform processing user-generated data, leveraging NLP to generate insights, recommendations, and behavioral trends
- Built NLP pipelines using OpenAI APIs for keyword extraction, mood classification, and automated insight generation
- Designed data models and workflows to analyze behavioral patterns and translate them into actionable user insights
- Implemented search and filtering systems to enable efficient querying and analysis of large text datasets

Manager in Trainee | McDonald's

Oct. 2020 - Nov. 2022

- Optimized staffing and inventory decisions using demand patterns, balancing cost and operational efficiency
- Improved workflow efficiency in high-volume environments

CERTIFICATES

Introduction to Tech Entrepreneurship | IIT Bombay

Nov. 2025

Deep Learning Specialization | DeepLearning.AI

Aug. 2023

Machine Learning Specialization | Stanford University

Jul. 2023

TECHNICAL SKILLS & INTERESTS

- **Programming:** Python (NumPy, PyTorch, TensorFlow, Pandas, Matplotlib), SQL, R, Java, C, Swift
- **Data & Analytics:** Advanced Excel (Modeling, Forecasting, Scenario Analysis), NLP, Machine Learning
- **Technologies:** Google Cloud, REST APIs, Git, Tableau
- **Interests:** Data Analytics & Business Intelligence, Cost Optimization & Operational Efficiency, AI & Machine Learning, Data-Driven Decision Making, Robotics & Intelligent Systems
